Atty. Okl. No. DIVA/245CIP3**IN THE SPECIFICATION:**

Please replace the following paragraphs.

Beginning at page 8, line 5:

B1 Details regarding the operation of the IPG page of Figure 1, the interaction of this page with other pages and with a user are described in commonly assigned US patent application Patent Application No. 09/359,560 filed July 23, 22, 1999 (attorney docket no. 070 CIP2) which is hereby incorporated herein by reference.

Beginning at page 19, line 1:

B2 The video compositor 1490 merges the graphical overlay signal VOSD and the uncompressed video stream VD to produce a modified video stream (i.e., the underlying video images with the graphical overlay) that is coupled to the frame store unit 1462. The frame store unit ~~562~~ 1462 stores the modified video stream on a frame-by-frame basis according to the frame rate of the video stream. Frame store unit ~~562~~ 1462 provides the stored video frames to a video processor (not shown) for subsequent processing and presentation on a display device.
